

1. Epidermal surface layer
2. Subcutaneous vascular blood supply
3. Sensory nerve endings
4. Clean hollow needle channel
5. Perpendicular entry angle
6. Tissue crush trauma avoidance

1. Epidermal surface layer
2. Subcutaneous vascular blood supply
3. Sensory nerve endings
4. Clean hollow needle channel
5. Perpendicular entry angle
6. Tissue crush trauma avoidance

A fast perpendicular pass with a hollow needle minimises wound trauma.

PRECISION DETERMINES THE SENSATION
