
1. *Epidermal hyperkeratosis*
2. *Dermo-epidermal junction leakage*
3. *Interphase dermatitis*
4. *T-cell lymphocyte infiltration*
5. *Macrophage accumulation*
6. *Granulomatous inflammation*
7. *Deep dermal tissue*

Chronic allergic reactions exhibit interphase dermatitis alongside heavy lymphocyte and macrophage infiltration.

HISTOPATHOLOGY OF ALLERGIC TISSUE REACTIONS
