

- |                                       |                                     |
|---------------------------------------|-------------------------------------|
| 1. Manufacturer identity and location | 5. Client-session batch linkage     |
| 2. Batch or lot number                | 6. EU Responsible Person            |
| 3. Complete safety data sheet         | 7. Third-party testing verification |
| 4. Distribution purchase records      |                                     |
| 7. Third-party testing verification   |                                     |

A traceable supply chain relies on five documented links from manufacturer to human tissue.  
**DELEGATE MANUFACTURE, NEVER DELEGATE VERIFICATION.**
