

**Never use
spring loaded
guns.**

This illustration shows a spring-loaded gun, which is orange and black, angled downwards. It is shown in the process of piercing a surface, with a large, jagged crack radiating from the point of impact. The background is a light beige color.

**Guns crush delicate
ear cartilage.**

**Always use
sterile hollow
needles.**

This illustration shows a sterile hollow needle, which is orange and black, angled downwards. The needle is shown in the process of piercing a surface, with a clean, straight line indicating the path of the needle. The background is a light beige color.

**Needles prevent severe
tissue shattering.**

**Spring loaded guns cause blunt force trauma to ear tissue.
Sterile hollow needles protect tissue integrity.**
